## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 6-8, 12 drawn to a FRZB-1 polypeptide, classified in class 530, subclass  
5 350.
- II. Claim 11, to the extent that it is drawn to a polynucleotide comprising the  
nucleotide sequence of SEQ ID NO: 4, classified in class 536, subclass 23.5.
- III. Claim 11, to the extent that it is drawn to a polynucleotide comprising the  
nucleotide sequence of SEQ ID NO: 8, classified in class 536, subclass 23.5.
- 10 IV. Claim 11, to the extent that it is drawn to a polynucleotide comprising the  
nucleotide sequence of SEQ ID NO: 10, classified in class 536, subclass 23.5.

The inventions are distinct, each from the other because of the following reasons:

The polynucleotides of Inventions II-IV are related to the polypeptide of Invention I by virtue of encoding same. The polynucleotide has utility for the recombinant production of the  
15 polypeptide in a host cell. Although the polynucleotide and polypeptide are related since the polynucleotide encodes the specifically claimed polypeptide, they are distinct inventions because they are physically and functionally distinct chemical entities, and the polypeptide product can be made by another and materially different process, such as by synthetic polypeptide synthesis or purification from the natural source. Further, the polynucleotide may be used for processes  
20 other than the production of the polypeptide, such as a nucleic acid hybridization assay.

The following pairwise combinations of products are independent and distinct, wherein neither member of a pair is required for the production or use of the other, and wherein each of

Art Unit: 1647

the pair can be manufactured independently of the other and used for independent and distinct purposes: II and each of III-IV; III and IV. Further, nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the  
5 meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141.

Because these inventions are distinct for the reasons given above and have acquired a  
10 separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required are not coextensive, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a  
15 separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claim 12 is generic to a plurality of disclosed patentably distinct species comprising:

1. a polypeptide encoded by the nucleotide sequence of SEQ ID NO: 4 or  
20 comprising the amino acid sequence of SEQ ID NO: 3;
2. a polypeptide encoded by the nucleotide sequence of SEQ ID NO: 8 or  
comprising the amino acid sequence of SEQ ID NO: 7; and

Art Unit: 1647

3. a polypeptide encoded by the nucleotide sequence of SEQ ID NO: 10 or comprising the amino acid sequence of SEQ ID NO: 9.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

5           Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

15

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
